of the International Brotherhood of Teamsters

Tony D. Cardwell *President*

Dale E. Bogart, Jr. *Secretary-Treasurer*

July 26, 2024

Dear General Chairpersons,

I am writing to provide an update on the annual rate of inflation, as measured by the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W), from 2022, and to share the current economic forecasts on inflation. PEB 250 concluded that "CPI-W has been and remains the most appropriate standard by which to measure the effects of inflation with respect to wage determinations" (PEB 250 Pg. 38). Therefore, the following information is crucial as it impacts our national freight negotiations moving forward.

CPI-W Overview:

The CPI-W measures the average change over time in the prices paid by urban wage earners and clerical workers for a basket of consumer goods and services. This index specifically focuses on urban households that derive more than half of their income from clerical or wage occupations and have at least one earner employed for a minimum of 37 weeks during the previous 12 months.

The CPI-W calculation involves regularly collecting prices for a representative selection of goods and services from various urban outlets. This basket of goods includes categories such as food, housing, apparel, transportation, medical care, recreation, education, and other services. The index measures the percentage change in the cost of this basket over time by comparing prices at different intervals. A base period, typically an average of prices over a specific period such as 1982-1984, is used as a reference point, with the index set to 100 during this period. Changes in the index reflect how prices have risen or fallen relative to this base period, providing a clear measure of inflation affecting urban wage earners and clerical workers.

Example:

Suppose the CPI-W in 2020 was 250, and the base period (1982-1984) CPI-W is 100. This indicates a 150% increase in the price level of the basket of goods and services from the base period to 2020. If the CPI-W increases from 250 to 255 over a year, it indicates a 2% inflation rate for that year for the basket of goods and services considered in the index. As of June 11, 2024, the CPI-W increased by 2.9% over the last 12 months to an index level of 308.054¹.

1https://www.bls.gov/news.release/cpi.htm#:~:text=The%20Consumer%20Price%20Index%20for%20Urban%20Wage%20Earners%20and%20Clerical,1982%2D84%3D100.

Historical Inflation Rates (CPI-W) Since 2022:

The annual rate of inflation under the CPI-W has experienced notable fluctuations in recent years. Below are the annual inflation rates: (https://www.nrlc.ws/EconomicData/cpi.aspx)

- 2022: 8.5% - 2023: 3.8%

These rates reflect significant inflationary pressures, particularly in 2022, influenced by post-pandemic economic recovery, supply chain disruptions, and geopolitical factors.

Current Predicted Inflation Rates:

While inflation projections are highly speculative and often unreliable, current economic forecasts and analyses from a consensus of 70 leading econometricians surveyed by the Wall Street Journal provide the following projected annual inflation rates (as of July 2024²):

December 2024: 2.83%December 2025: 2.31%December 2026: 2.21%

These predictions suggest a gradual decline in the rate of inflation, indicating a stabilization of economic conditions. However, it is important to note that these forecasts are subject to change based on unforeseen economic events and policy changes.

Implications:

The information provided here is essential for our strategic planning and negotiations. Understanding the trajectory of inflation helps us better advocate for fair wage adjustments and ensures that our members' purchasing power is protected. As a bargaining unit our objective is to secure real wage growth in our negotiations, rather than merely keeping pace with the current rate of inflation. Nevertheless, it remains crucial that we monitor economic trends as they develop.

We will continue to monitor these trends closely and provide updates as necessary. Should you have any questions or require further details, please do not hesitate to contact me.

Thank you for your continued dedication and support to the membership and our Brotherhood.

Sincerely,
Zachoy

Zachary J. Wood BMWED Director of Strategic Coordination and Research
